EDUCATION

Bachelor of Engineering
Sir M. Visvesvaraya Institute
of Technology, Bangalore
2015 – 2019

CERTIFICATIONS

- PMP Certification Training
- Lean Six Sigma – Green Belt
- Foundations of PM – Google
- Product Management – Microsoft
- Data Lean Certification

SKILLS

Product
Road mapping · PRD Writing · User Research
· A/B Testing · Agile · KPI Frameworks · Go-
to-Market · Stakeholder Mgmt.

Technical
Python · SQL · ETL · GCP · Big Query · Py-
Spark · Hive · Teradata · Datadog

Domain
MarTech · Multi-Channel Campaigns · User
Segmentation · Data Pipelines · Vendor
Integration · Fintech / Payments

ACHIEVEMENTS

- 🏆 **Frontline Star**
Led end-to-end product lifecycle at PayPal
— campaign efficiency +60%, user adoption
+30%.
- 🏆 **Gold Award**
Drove \$30K cost savings and improved
operational efficiency by 98% across
departments.
- ⭐ **Rising Star**
Led a team of 5 to drive 98% process
improvement, surpassing all targets.
- 🥈 **Silver Award**
Mentored 3 junior members — team
engagement & satisfaction increased by
20%.

SUMMARY

Associate Product Manager with 6+ years building data-driven marketing products at PayPal. End-to-end ownership — user research, road mapping, cross-functional execution — with **98% on-time delivery**. Experienced simplifying multi-source workflows (Adobe, Venmo, SFMC) and shipping features that drive measurable engagement and campaign growth.

EXPERIENCE

Associate Product Manager May 2023 – Present
Genpact (Client: PayPal) · Noida, India

MDX Pipeline Framework (GCP + DALM) · Platform Consolidation

- **Identified fragmentation** across 3 siloed pipeline stages owned by different teams → led design of a **config/metadata-driven, vendor-agnostic MDX framework** on GCP + DALM, eliminating all hardcoded vendor logic.
- **Architected a centralized BQ config table** (source, query, format, frequency) → reduced new vendor onboarding from weeks of engineering to **infra provisioning + 1 config entry**.
- **Defined 3 reusable job types** — EXPORT, IMPORT, DML — covering all pipeline scenarios across **Adobe RT-CDP, SFMC, Braze, Interaction Studio, and Pardot**.
- **Enabled multi-brand, multi-vendor delivery** across PayPal, Venmo, Xoom & Fastlane — single GCS Drop Zone file reused across destinations via SFTP, GCS, and API.
- **Drove full observability via Datadog**— audit log tables, email alerts & daily volume monitoring → eliminated duplicated alerting across all parallel pipelines.

Marketing Data Platform · Product Development

- **Owned product roadmap** across 3 engineering squads → prioritized by user impact & feasibility → **98% on-time delivery**.
- **Identified campaign decision delays** via stakeholder interviews → built observability systems → **incident detection –80%, uptime 99.9%**.
- **Diagnosed ETL bottlenecks** → re-architected workflows → **ETL latency –70%**, campaign execution 5x faster.

User Engagement & Growth · Growth

- Analyzed user drop-off → launched **targeted push notification workflows** → engagement +60%, conversion +70%.
- Redesigned legacy campaign workflows → **efficiency +60%**, user adoption +30%.

Product Analyst Apr 2021 – May 2023
Genpact (Client: PayPal) · Noida, India

Operational Efficiency · Cost Reduction

- Audited legacy workflows → drove optimization initiatives → **reduced operational costs by \$4M annually**.
- Mapped user journeys & friction points → automated manual processes → **processing time –40%**.
- Led sprint planning & backlog for 5 squads → achieved **96% milestone success rate**.
- Conducted user research → delivered tailored solutions → **client satisfaction 98%**.

Associate Data Engineer Aug 2019 – Apr 2021
Genpact (Client: PayPal) · Bangalore, India

Marketing Data Infrastructure · Platform

- **Built scalable data systems** for PayPal marketing workflows → **targeting accuracy +80%**, campaign efficiency +40%.
- Designed data models for user segmentation & multi-channel engagement supporting 50M+ users.
- Automated data pipelines end-to-end → **processing time –90%**, ensuring high accuracy for stakeholder decision-making.
